## ■ SECTION 07 SYMPTOMS OF OVEREXPOSURE

Symptoms of Ingestion: Ingestion of significant quantity of concentrate may cause nausea, vomiting, and abdominal pain, diarrhea.  
Symptoms of Inhalation: If misted in concentrated form can cause irritation of mucous membrane, nose, eye and throat.  
Symptoms of Skin Contact: May cause dermatitis or irritation in some individuals upon prolonged contact. Localized skin defatting can be expected from any concentrated detergent on long contact.  
Symptoms of Eye Contact: Can cause stinging or burning sensation of eyes and lids, watering of eye, conjunctivitis in concentrate. Stinging and burning sensation in use solution.

## ■ SECTION 08 EMERGENCY FIRST AID PROCEDURES

For Ingestion: DO NOT attempt to induce vomiting. Have the individual drink one or more full glasses of water. NEVER give anything to an unconscious person. Call a physician or your local Poison Control Center. Treatment should be directed at the control of symptoms and the clinical condition of the patient. There is no specific antidote.  
For Skin: As for all foreign materials, wash off concentrate or diluted use solution with water. Remove clothing that has been saturated by concentrate.  
For Eyes: PROMPTLY flush with large amounts of water for 15 minutes, occasionally lifting the lower and upper lids. Call a physician for further medical advice if irritation persists.  
Medical Conditions  
Aggravated by Exposure: No data found.

## ■ SECTION 09 OCCUPATIONAL CONTROL PROCEDURES

Ventilation: Use with adequate ventilation. Working solution should not present any hazard. If misted or an aerosol is generated, local or mechanical exhaust recommended to maintain vapor concentration below TLV. This level, however, should not be reached under normal working conditions.  
Respiratory Protection: Not required under normal working/use conditions.  
Eye Protection: Not normally required. Use if in specific applications working solution will get into eyes.  
Skin Protection: Use gloves if hands will be continuously in solution, not normally necessary in general uses.  
Personal Hygiene: As in handling any detergent, wash thoroughly after using.

## ■ SECTION 10 PRECAUTIONS FOR SAFE HANDLING STORAGE AND USE

Precautionary Measures: Avoid contact with eyes and prolonged contact of concentrate with skin. Avoid breathing misted vapors. Use with adequate ventilation. Do not store at elevated temperatures greater than 150°.  
Spills Clean-up Procedures: Concentrated materials are packed in unit-dosed bags limiting any spills to very small quantities. Paper toweling or mopping is usually sufficient.  
Disposal Method: Normal waste disposal of empty bags in accordance with state and local regulations or recycle after rinsing package.

## ■ GENERAL NOTE ABOUT PRODUCTS

SFSPac® All Purpose Cleaner detergent formulation is not substantially different from any other commercially available hard surface cleaner or for that matter any household spray cleaner available in most grocery stores. The unique packaging of these materials in unit dosed bags limits the amount of exposure of the concentrate to very small amounts. Spills can be cleaned up with paper toweling or plain mopping, as these are in fact products for mopping as well as other maintenance chores. We know of no serious hazards associated with the proper use and handling of this product.
